

SPECIALTY WORKWEAR

Heat & Hydration Chill-Its 6603 Evaporative Cooling Band

- » **INSTANT COOLING RELIEF** – Hyper-evaporative PVA easily activates with water for up to four hours of cooling
- » **STAY-PUT DESIGN** – Unique pull-through slot secures band around neck for fuss-free all-day wear
- » **COMFORTABLE** – When wet, band remains soft and bulk-free for wear around the neck
- » **SUN PROTECTION** – UPF 50+ protection from harmful UV rays
- » **WORKDAY TO WEEKEND** – Also great for outdoor recreation such as running, hiking or other activities
- » **MACHINE WASHABLE** – Air dry until band is stiff, re-wet to reactivate and soften

The **Ergodyne Chill-Its 6603 Evaporative Cooling Band** features advanced PVA cooling technology for relief in extreme heat. When wet, this band remains lightweight and comfortable for bulk-free wear around the neck. A unique pull-through design allows the band to be secured around the neck for all-day cooling. Rated to UPF 50+ protection from harmful UV rays. Heat-related illness continuously ranks among the top causes of worksite accidents and fatalities. Evaporative cooling technologies such as PVA (polyvinyl alcohol) are a simple, effective and comfortable solution for heat stress prevention. Similar to how sweat cools the body, evaporative technologies use an external water source to draw heat away—helping to regulate body temperature while providing cool relief. When activated, this PVA cooling towel is comfortable and refreshing for even the hottest days of the year. Run the PVA cooling band under water for one minute or until saturated, wring out excess water and wave to activate with airflow. Drape towel around neck for four hours of cooling relief. The PVA material will dry stiff, simply rewet until soft to reactivate. This evaporative cooling towel is ideal for construction, landscaping, roofing or anyone working in the heat. It can also be used to reduce the risk of heat stress for outdoor recreational activities.

EASY ACTIVATION

Reusable: Re-wet to activate

Run or submerge under water for one minute to activate cooling technology

EVAPORATIVE COOLING TECHNOLOGY

PVA easily activates with water for cool relief on hot days

STIFF WHEN DRY, SOFT WHEN WET

Hang dry

Wet to activate

PVA material will dry still like a sponge, simply rewet to soften

STAY-PUT DESIGN

Pull-through band secures band around neck

DIMENSIONS
10 x 75cm
