

ERGONOMICS

Protection where you need it!

ProFlex® 360 Hard Shell Hinged Knee Pads - Non-Marring Rubber Cap

- » **MOVES WITH YOU** - Free-moving hinge design fully extends to match the knee's natural movements
- » **BUILT TO LAST** - Heavy-duty shell and buckles for long-lasting use on tough worksites
- » **ALL-DAY COMFORT** - Thick closed-cell foam padding supports and cushions joints Ideal for all-day knee protection
- » **NO BINDING** - Straps sit further apart on thigh and calf to prevent uncomfortable binding
- » **PROTECTION ON ANY SURFACE** - Heavy-duty shell makes for optimal performance on both abrasive and delicate surfaces
- » **EXTRA-LARGE NON-MARRING RUBBER CAP** - Soft cap completely covers knee to maximise stability and prevent floors from becoming marked or scratched
- » **DURABLE LOCKING BUCKLES** - Securely latch to prevent knee pads from sliding around when on the move
- » **ADJUSTABLE** - Thick elastic straps easily adjust for custom fit

The **Ergodyne The ProFlex 360 Hard Shell Hinged Knee Pad** feature an ergonomic hinge design that is built to keep protection comfortably in place whether walking, crawling or kneeling. The combination of a heavy-duty hard shell with a soft non-marring cap makes these pads versatile. Unlike other knee pads of this style on the market, the free-moving hinge design enables smooth and full 180-degree extension of the pad when straightening the knee. Thick closed-cell foam padding provides supportive all-day comfort, while the extra-large rubber cap maximizes surface area to increase stability and minimise risk of scratching or marking flooring such as tile or linoleum. Wide elastic straps easily adjust for a custom fit on a variety of leg sizes, and are designed to sit further apart on the thigh and calf to prevent uncomfortable binding. Tested to hold up to repetitive use on the toughest worksites, the durable locking buckles securely latch to keep these knee pads comfortably in place no matter which direction you move.

STAYS IN PLACE
