

FALL PROTECTION & HAZARDS

Tool Lanyards

Squids 3700 Web Tool Tails

- » **MEETS ANSI/ISEA 121-2018** – Third party certified to a 0.9kg maximum working capacity with a 2:1 safety factor
- » **RETROFIT ATTACHMENT POINT FOR TOOL TETHERING** – Affix to small hand tools or anchor points to create an attachment point for tethering tool lanyards
- » **BUILT TO LAST** – Heavy-duty nylon webbing, high tensile strength nylon thread and double stitched web catch for durability in harsh conditions
- » **DURABLE D-RING** – Captive hole for attaching tool lanyards
- » **MULTI-PACKS / LENGTHS**

The **Ergodyne Squids 3700 Tool Lanyard Web Tool Tails** act as a retrofit attachment point on tools, belts, harnesses or structures that can be used to tether small hand tools up to 0.9kg and prevent dropped or falling objects from occurring on the job. Built for secure attachment to tools, this anchor attachment is made of heavy-duty nylon webbing and high-tensile strength nylon thread. Both ends feature a reinforced double stitch web catch for a more durable stop. Once the base of the tail is securely taped to the tool or anchor point, the plated D-ring acts as a captive hole for tethering tool lanyards. For best use, tape the loop end of the tool tail with 3775 Squids Self-Adhering Tape.

When working at-heights, it's essential to tether your tools. Fall protection lanyards and tethers are pieces of safety equipment designed to attach one end securely to a fixed anchor point, and the other to an appropriate attachment point on a tool by proper tethering. Ideal for those who need to tether tools in industries like construction, telecommunications, oil and gas, power generation, utilities, wind energy, manufacturing or other jobs at heights.

DURABLE SECURITY

Nylon webbing, high tensile strength nylon thread and double stitched web catch

RETROFIT ATTACHMENT POINT FOR TETHERING

Durable D-Ring

Affix to hand tools

EASY INSTALLATION

Secure with Squids 3775 Self-Adhering Tape (Sold Separately)

TETHER TOOLS AT HEIGHTS

Tested and approved to ANSI/ISEA 121 for dropped object prevention

DIMENSIONS
9cm - 21.5cm Length
