

KNEE PROTECTION

**ERGONOMIC
INNOVATION**

KNEE PROTECTION MATTERS

Effective knee PPE not only shields your knees from potential injuries but also allows you to perform at your best with confidence and comfort. Ergodyne's range of **ProFlex Knee Pads** are positive proof there's a big difference between getting the job done right and just getting by.

WORKERS CAN FACE SEVERAL RISKS

REPETITIVE MOTION

Kneeling, crawling, or bending can lead to repetitive motion injuries, such as bursitis or tendinitis, which cause longterm pain in the knee.

IMPACT INJURIES

Workers are exposed to falling objects or sudden impacts while working which can cause serious knee injuries.

UNEVEN SURFACES

Working on uneven or unstable surfaces increases the likelihood of trips, slips, and falls, potentially leading to knee injuries.

Knee injuries account for 13.2% of all musculoskeletal worksite injuries in Australia.

KNEE PAD

ProFlex® 450 Comfort Hinge Gel Knee Pads

The Ergodyne ProFlex 450 Comfort Hinge Gel Knee Pads improve upon our best-selling 350 Knee Pad design by adding an innovative hinged technology that enhances comfort, fit and stability. The hinge enables the knee pad to easily bend and straighten along with the leg's natural movements.

#18467 ProFlex 367 Lightweight Gel Knee Pads Rounded Hard Cap

STAFF PICK

"The 367 is the perfect blend of protection, comfort and price. Flexible outer cap for penetration protection with a deep hexagonal tread that provides non-slip properties. Surrounded by breathable mesh fabric and supported by a thick neoprene strap improves comfort over all other knee pads. This knee pad truly is the bee's knees!"
