

PRODUCT SPOTLIGHT

Length Management

The coiled cable design keeps the length of the lanyard close to the anchoring point. This feature is crucial in reducing snag hazards associated with traditional lanyards and preventing dropped objects.

Safety Standards Compliance

The Squids 3130M Coil Lanyard is approved to the ANSI/ISEA 121-2018 standard, ensuring that they meet industry safety requirements.

Carabiner Quality

The lanyard features stainless steel carabiners (#304), indicating high-quality materials for secure attachments.

Captive Eye Carabiner

The inclusion of a captive eye carabiner enhances safety and security, preventing accidental detachment.

Coil Design for Safety

The coil design of the lanyards is a significant feature. It prevents snag and tangle hazards, addressing common issues associated with traditional lanyards.

Weight Capacity

The Squids 3130M heavy-duty design tethers tools up to a maximum safe working capacity of 2.3kg.

Construction Material

The 3130M is constructed with PU covered aircraft cable, providing durability and resistance to wear and tear.

360° Swiveling Design

The 360° swiveling design prevents tangles but also addresses potential headaches caused by the coiled design and reduces recoil force, preventing aggressive snap back.

CONSTRUCTION MATERIALS

PU Coating, Swiveling Design
Polyurethane (PU), Stainless Steel

WORKING LENGTHS
25cm - 122cm

2:1 SAFETY FACTOR
